

Weekend at the Reservoir

Meet Save Barnegat Bay and learn how they have been working to restore and protect the Barnegat Bay ecosystem. For more than 45 years, they have been advancing campaigns in advocacy and education throughout the Barnegat Bay watershed, which covers Ocean County and the southern portion of Monmouth County. The success of Save Barnegat Bay is the result of its strong connection to the Bay, environmental expertise, ability to collaborate with other organizations, and credibility as a community-based nonprofit 501(c)(3) organization with a record of accomplishment. BTMUA and SBB share common goals of protecting the area's rivers and streams from non-point source pollution and its woodlands and wetlands from degradation. Please join this educational program and learn how you can help protect the Metedeconk River and Barnegat Bay.
