Brick Township Municipal Utilities Authority
Ocean County, New Jersey
Granular Activated Carbon (GAC) Treatment Addition
State Project No. 1506001-011

In accordance with procedures established to evaluate projects that have applied for assistance under the New Jersey Environmental Infrastructure Financing Program (EIFP), a Level 1 environmental review has been conducted on the proposed project which includes the construction of a granular activated carbon (GAC) system with total of 24 GAC vessels and appurtenances housed within two new buildings approximately 50 feet wide by 117 feet long and 29 feet high at the William Miller Jr. Water Treatment Plant (WTP) located at 1551 Route 88 West, Brick Township. Approximately 400 linear feet (LF) of 12-inch ductile iron pipe (DIP) and approximately 470 LF of 24-inch DIP will be constructed to connect the GAC system to the filter influent/effluent and the finished water pumps/tank. Approximately 65 LF of 16-inch DIP, 600 LF of 30-inch DIP and 125 LF of 14- inch DIP will be constructed as a clearwell overflow and will carry the water to the existing on- site stormwater system. The project will include the construction of emergency measures to provide resiliency during both a power outage and an emergency generator failure.

The New Jersey Department of Environmental Protection has made a preliminary decision to assist this project under the EIFP. The proposed project costs are as follows:

Proposed Project Cost: \$20,890,000

Proposed Loan Amount: \$20,890,000

Upon written request, the planning document and the Department's Environmental Decision Document will be available for public review at the Brick Township Municipal Utilities Authority located at 1551 NJ-88, Brick, NJ 08724.
