

PUBLIC NOTIFICATION VIOLATION REQUIREMENT

The following violations are Reporting Violations (Tier 3 Violation) that at no time affected the water quality of the water supplied by Brick Utilities. These are also listed in the 2023 Consumer Confidence Report (CCR).

2023-1832 Due to a typographical error the December 2022 total coliform results were deemed late. This was a paperwork violation and at no time was there any water quality issue.

2023-1829 Failure to Submit Annual Lead Service Line Replacement (LSLR) Plan – The NJDEP changed the plan format after the initial submittal and required us to redo the form with additional information.

2023-1830 Fail to Submit Annual Lead Service Line Replacement (LSLR) Progress Report – We did not submit this report because Brick Utilities does not currently have any lead service lines in the distribution system. The State later required us to fill out the report regardless of no lead services.
